

Н-индексът на Българската академия на науките е 202

Н-индексът е въведен за оценка на научните постижения на отделни учени, но напоследък все по-често се използва за оценяване както на актуалността на различни области от науката, така и за научни институции. Съгласно Web of Knowledge Н-индексът на Българската академия на науките към 13.09.2019 г. е 202. За сравнение, Н-индексът на България е около 260. Макар и да не отчита редица фактори, като например различна средна цитируемост в отделните науки, Н-индексът дава обща представа за влиянието на дадена институция.

По-долу е представен списък на научни трудове на учени от БАН, които са цитирани поне 202 пъти всяка. Имената на авторите от БАН са показани с удебелен шрифт. Включени са само статии, в които е даден адресът на съответното структурно звено на БАН. 59 от статиите са публикувани в резултат на широко международно сътрудничество и са с повече от 30 съавтора, като в тези случаи не са изписани имената на всички съавтори.
