

Documents

- 1) Akpan, E.D., Dagdag, O., Ebenso, E.E.

Progress on the coordination chemistry and application of hydantoins and its derivativ materials for steel: A review

(2023) *Coordination Chemistry Reviews*, 489, art. no. 215207, .

- 2) Varma, R.R., Pandya, J.G., Vaidya, F.U., Pathak, C., Dabhi, R.A., Dhaduk, M.P., Bhatt, B.S., I

DNA interaction, anticancer, antibacterial, ROS and lipid peroxidation studies of quino: Re(I) carbonyls

(2021) *Journal of Molecular Structure*, 1240, art. no. 130529, .

- 3) Alvarado-Soto, L., Ramirez-Tagle, R.

Relativistic Structure-Activity Relationship of Cisplatin(II) Complexes

(2020) *Journal of Structural Chemistry*, 61 (5), pp. 688-693.

- 4) Štarha, P., Vančo, J., Trávníček, Z.

Platinum iodido complexes: A comprehensive overview of anticancer activity and mec

(2019) *Coordination Chemistry Reviews*, 380, pp. 103-135.

- 5) Galkina, P.A., Proskurnin, M.A.

Supramolecular interaction of transition metal complexes with albumins and DNA: Spe estimation of binding parameters

(2018) *Applied Organometallic Chemistry*, 32 (4), art. no. e4150, .

- 6) Georgieva, S., Todorov, P., Naydenova, E.

Investigation of redox mechanisms of biologically active hydantoin derivatives by diffe

(2017) *Analytical and Bioanalytical Electrochemistry*, 9 (2), pp. 214-231.

7) Gemili, M., Sari, H., Ulger, M., Sahin, E., Nural, Y.

**Pt(II) and Ni(II) complexes of octahydropyrrolo[3,4-c]pyrrole N-benzoylthiourea derivati
characterization, physical parameters and biological activity**
(2017) *Inorganica Chimica Acta*, 463, pp. 88-96.

8) Bakalova, A., Buyukliev, R., Momekov, G.

**Synthesis, DFT calculations and cytotoxic investigation of platinum complexes with 3-
and 4-thio-1H-tetrahydropyranespiro-5'-hydantoin**
(2015) *Journal of Molecular Structure*, 1091, pp. 118-124.

9) Bakalova, A., Buyukliev, R., Varbanov, H., Momekov, G.

**Design, synthesis and comparative cytotoxic investigation of platinum(II) complexes w
methyl-5-(4-pyridyl)hydantoin**
(2014) *Inorganica Chimica Acta*, 423 (PB), pp. 46-51.

10) Bakalova, A., Momekov, G.

**Structure activity relationships investigation in a class of new platinum complexes wi
toins and spiro-5-hydantoins**
(2014) *Pharmacia*, 61 (3), pp. 33-42.

11) Beloglazkina, E.K., Majouga, A.G., Mironov, A.V., Yudina, A.V., Kuznetsova, O.Y., Zyk, N.V.

**Conversion of 2-thiohydantoins and their derivatives to the corresponding hydantoin:
complexation reactions with copper(II) chloride dihydrate**
(2014) *Polyhedron*, 76, pp. 45-50.

12) De Almeida, S.M.V., De Alcantara, F.F., De Brito, C.G.X., De Souza, G.C.A., Lafayette, E.A.,
Carvalho, M., De Lima, M.C.A.

**Platinum hybrid coordinated compounds in cancer treatment [Compostos coordenad
tratamento do câncer]**
(2014) *Revista de Ciencias Farmaceuticas Basica e Aplicada*, 35 (3), pp. 337-345.

13) Georgieva, S., Todorov, P., Wesselinova, D.

Synthesis, characterization and cytotoxic activity of novel Cu(II) and Co(II) complexes

dimethylhydantoin

(2014) *Comptes Rendus Chimie*, 17 (12), pp. 1212-1220.
